JEFFERSONIAN DEMOCRACY

A great deal is being said these days about the interpretation of the Constitution, particularly articulate when anyone is suspected of doubting that the constitution should be looked upon with reverence. It is not to be denied, however, that it can be touched by amendment or fitted to the circumstances of the nation. Well, here's what a pretty good Jeffersonian democrat of another day had to say:

"...we must look at constitutions with something like reverence and deem them like the ark of the covenant, too sacred to be touched. They ascribe to the men of the past the wisdom and sagacity which they did not have beyond amendment. I know that ages well; I believed in it, and labored with it. ... We might as well burn the coat which fitted him when a boy as civilization to ruins under the hand of a general who has never seen a battle-field or schoolhouse buck in the horse-and-buggy era. Aplow, the red flannels 'aint' where they used to be."

Upon reading which, F.P.A. of the New York Herald Tribune was moved to applaud that great Jeffersonian democrat of another day, himself, who uttered the foregoing in a letter to Samuel Kerchavat at Monticello under date of July 12, 1816; perhaps with no idea that the words would strip the clock of Jeffersonian democracy from the

likes of Al Smith, Eugene Talmadge and others who deny that any of this nation has a right to hit the dead hand of another century from what is the direct concern of their generation—Fort Myers News-Press.

GLORIOUS GALLIPOLIS

Where are the red flannels of yesterday? Those dandies in the papers and authors of the press joined the quest for colorful specimens from the olden times.

Reporters slipped up last night to the playhouses of New York and Fifth Avenue to the Bowery quizzing swanky shepheepers and punch-card peddlers.

"Yes, we have no red flannels," they said. "With the country correspondents, advised the managers, who returned to their offices and ransacked their attics to find the garments.

The managers, however, had a plan by which "A Night at the Opera" was previewed, "cold" and gauged for laughs before a single scene of the picture went into the cameras.

To test the veracity of their original homogeneous solutions, the famous Marx Brothers first tested the picture by having the play produced, and all on a straight stage tour.

All the scenes were being tested in front of the theatre audiences, and the results were quite good, George S. Kaufman wrote in the New York Times.

He said, "The audience for 'Frogs' this winter, but none in stock. No, they didn't know what had become of the remembered red flannels which were the joy of many a boy and humorist—but the band of terrorized and schoolboys buck in the horse-and-buggy era. Aplow, the red flannels 'aint' where they used to be."

So the country was combed for news. Other cities were queried. Crossroads stores were visited, and the manager of the "Opera" for "Frogs" this winter, but none in stock.

No, they didn't know what had become of the remembered red flannels which were the joy of many a boy and humorist—but the band of terrorized and schoolboys buck in the horse-and-buggy era. Aplow, the red flannels "ain't" where they used to be."

So the story went.

The cast may be "off." But not the middle west. Glorious Gallipolis. The hardihood of the pioneers still lives. They can still "tide it"—even red flannel underneath.

GOVERNOR BY CHANCE

With 16 eligible candidates, including 11 in the field campaigning for votes, Florida voters this year and themselves were bewildered than self-styled "experts" and guarded statements of most of them.

Most sensational of the recent entrants is Eddie Martin of Cristiania, former secretary of Gov. Dan G. Miller, who ran as "Dan the Man" and claims 61 legislative seats.

The cast may be "off." But not the middle west. Glorious Gallipolis.

The hardihood of the

pioneers still lives. They can still "tide it"—even red flannel underneath.
